## KATTLE KAKER

Hastings Kattle-Kaker lets you feed range cake, pellets, wafers, or cubes without leaving the cab of your pickup. You feed “on the go” in the comfort of your truck cab, safe from crowding and trampling cattle. You can load the bin from your bulk supply or sacks before going to pasture.

In snow, popular rear delivery model gives added efficiency by dropping feed directly into ready made “feed trough” formed by the tire track. “Fines box” saves small particles of feed that would otherwise be wasted.

Model # 1

Fully welded angle frame provides solid base.  
Bin is made of 14 Ga. HR Steel with hinged weather proof cover that provides a large 20” x 36” fill opening.  
Spring-loaded dispensing gate provides positive control of flow at desired rate ( maximum opening of 64 square inches).

Retractable Dispensing Chute handles all sizes of pellets, cubes or wafers.

Model No. 1 has non-clog offset chute with a full six-inch adjustment which allows placement of feed into tire track.  
Model No. 2 has a non-clog straight chute that is 10” wide x 24” long.  
Fines Box collects all cake other than range size. Remote Control is achieved through use of sturdy lever arm and heavy nylon rope through positive action pulleys.

Model # 2

Length	36”
Width	35”
Height	36”
Capacity	500#
Shipping Weight	185#
